

BlueBay Global Monthly Income Bond Fund

Investment objective

To provide high regular monthly income and total returns comprised of interest income and modest capital appreciation. The fund invests primarily in global high-yield debt securities, emerging market government and corporate debt securities, and global convertible bonds either directly or indirectly through investments in other mutual funds managed by RBC GAM or an affiliate. The investment team combines top-down asset allocation and bottom-up credit selection to provide investors with diversified, "through the cycle" exposure to multiple credit strategies. The team employs dynamic asset allocation, seeking to take advantage of relative value within the sub-asset classes of emerging market debt, global high yield and global convertibles over a 6-12 month timeframe. The Fund also focuses on capital preservation: bottom-up preservation of capital, through best-ideas credit selection, and top-down capital preservation, through dynamic asset allocation and liquid portfolio hedging strategies.
